INSTRUMENTS & CONTROL SYSTEMS

a Chilton publication

Annual Index

January-December, 1973

Annual Index

Volume 46, 1973

This index is a guide to the subjects, titles, and authors of all the articles published in INSTRUMENTS AND CONTROL SYSTEMS during 1973. The numbers in bold face type refer to the month of the issue, followed by the page number.

SUBJECTS

Acoustic Measurement
Sensing Cryogenic Fluid Level, by W. F. Schopp, **5**:73
Adaptive Control
R&D: Needs & Priorities in Control, by Alan Krigman, **7**:45
Adhesives
Understanding and Applying Strain Gages. Part II: Carriers, Adhesives and Coatings, by Ben Anzalone, **1**:60
Alenpahi, W. F.
Small Shops Adopt NC: Chips are Flying, by Hy Natkin, **9**:55
Algorithms
Digital Control Algorithms. Part I: Dahlin Algorithms, by Kuo-Cheng Chiu, A. B. Corripio and C. L. Smith, **10**:57
Algorithms/Computers
Digital Control Algorithms. Part II. Kalman Algorithms, by Kuo-Cheng Chiu, A. B. Corripio and C. L. Smith, **11**:55
Digital Control Algorithms. Part III: Tuning PI and PID Controllers, by Kuo-Cheng Chiu, A. B. Corripio and C. L. Smith, **12**:41
Aluminum Co. of America
Understanding Microprogramming, by Dorothy Strickland, **9**:69
American Automatic Control Council
Professional Registration for Control Systems Engineering, by Alan Krigman, **4**:13
American Can Co.
Managing Solid Wastes: Pilot Projects, by Dorothy Abel, **8**:11
American National Standards Institute
Product Liability Prevention: Safety Standards the Key, by J. A. Dillion, **11**:29
American Petroleum Institute
Air Pollution: Industrial R&D, by J. A. Dillion, **3**:27
American Textile Manufacturers Institute
Pollution Control in the Textile Industry, by Dorothy Abel, **10**:15
Amplifiers
See: Specific type
Analog Computers
Analyzing Low Frequency Random Phenomena with an Analog Computer, by P. R. Kommineni and G. M. Smith, **4**:55
Analog Devices, Inc.
Remote Processors: Economy and Reliability, **5**:87
Using Analog Function Modules, by Dan Sheingold, **11**:41
Analog Functions/Signals
Using Analog Function Modules, by Dan Sheingold, **11**:41
Analog-to-Digital Converters
Cyclic Analog-to-Digital Conversion, by James Barnes, **3**:35
Anemometers
Heated Sensors for Flow Measurement, by Reuben Wasserman and Howard Grant, **5**:59
A Low-Velocity Hot-Wire Anemometer, by T. S. Sarma and G. R. Sarma, **4**:62
Anilam Electronics Industrial Controls Div.
Automated Machine Tool Positioners, **1**:79
Anixter Data Systems
Understanding Annunciators, by R. M. Dujmovic, **7**:51
Annunciators
Understanding Annunciators, by R. M. Dujmovic, **7**:51
Applied Automation, Inc.
R&D: Needs & Priorities in Control, by Alan Krigman, **7**:45
Arkansas Power and Light Co.
Low Value Voltage Source, by J. E. McAlister, **7**:42
Astrosystems, Inc.
Position Transducers, **2**:76
Atomic Energy Commission
Breeder Reactors: The AEC and National Policy, by Alan Krigman, **2**:13
Audiometry
Loudness: How a Human Judgment is Quantified, by W. L. Howes, **2**:73
Noise and Human Performance, by W. F. Grether, **2**:23
Automated Testing
Automated Test Equipment: Panacea for Some, Headache for Others, by Hy Natkin, **10**:42
Automatic Control
Automated Engine Testing, by F. W. Kirk and Stanley Rose, **1**:37
Automated Machine Tool Positioners, **1**:79
Automation
Bits, Bugs, Brains, and Bosses, by P. W. Murrill, **7**:35
Computers for Control and Automation, by Alan Krigman, **2**:21
Designing the Operator into Highly Automated Systems, by H. L. Ammerman and W. H. Melching, **3**:67
Productivity: Not by Machine Alone, by Hy Natkin, **4**:31
Automobile Manufacturers Assn.
Air Pollution: Industrial R&D, by J. A. Dillon, **3**:27
Automobiles
Automotive Diagnosis, by D. S. Goren, **4**:17
BLH Electronics, Inc.
Understanding and Applying Strain Gages. Part II: Carriers, Adhesives and Coatings, by Ben Anzalone, **1**:60
Understanding and Applying Strain Gages. Part III: Lead Wires, by Ben Anzalone, **2**:70
Bakeries
See: Food Processing Plants
Balance Method
See: Nulling Technique
Barometric Pressure
Updating a Calibration System: A Case History, by J. R. Miller, **5**:63
Battelle Columbus Laboratory
Instrumentation Removes Much of the Need to Have Humans on Site, by Alan Krigman, **7**:4
Simple Inexpensive Concepts are Also Needed, **5**:13
Understanding Dimensional Instability, by R. E. Maringer, **5**:65
Validating Air Pollution Test Methods, by J. A. Dillon, **7**:25
Batteries
Guide to Selecting Uninterruptible Power Systems, by Instruments and Control Systems Staff, **3**:84
Bechtel, Inc.
Instrumentation Under OSHA, by J. A. Dillon, **3**:13
Professional Registration for Control Systems Engineering, by Alan Krigman, **4**:13
R&D: Needs & Priorities in Control, by Alan Krigman, **7**:45
Using Control Valves in Bypass Service, by A. E. Nisenfeld and J. Eskes, **9**:29
Using Dedicated Computers for On-Line Process Control. Part III: Performance, by A. E. Nisenfeld, Roger Miyasaki, R. E. Lynch and J. A. Conover, **1**:64
Belinger, Harry
The Cities Have a Lot to Offer, **2**:11
Bell & Howell Co.
Automated Engine Testing, by F. W. Kirk and Stanley Rose, **1**:37
Controlling Compressor Surge, by Frank Friedli, Hans Lenz and Stanley Rose, **2**:36
Bituminous Coal Research Inc.
Air Pollution: Industrial R&D, by J. A. Dillon, **3**:27
Black Clawson Co.
Managing Solid Wastes: Pilot Projects, by Dorothy Abel, **8**:11
Breakdown Voltage
Low Value Voltage Source, by J. E. McAlister, **7**:42
Breeder Reactors
See: Nuclear Production Reactors
Brewing
See: Fermentation

C & L Machining Co.
Small Shops Adopt NC: Chips are Flying, by Hy Natkin, **9**:55
Cabot Corp.
Innovation and the Economy, by Alan Krigman, **5**:25
Cage Valves
Piston-Balanced Control Valves, by Paul Wing, **9**:59
Calibration
Automated Test Equipment: Panacea for Some, Headache for Others, by Hy Natkin, **10**:42
Updating a Calibration System: A Case History, by J. R. Miller, **5**:63
California Board of Registration for Professional Engineers
Professional Registration for Control Systems Engineering, by Alan Krigman, **4**:13
California Institute of Technology
R&D: Needs & Priorities in Control, by Alan Krigman, **7**:45
California Society of Professional Engineers
Professional Registration for Control Systems Engineering, by Alan Krigman, **4**:13
Canton Electric Light and Power Co.
Electrical Demand: Buying Energy and Power, by Robert McConnell, **10**:25
Capacitors
Using a Capacitor to Measure Particle Flow, by T. Tanaka, K. Gotch and H. Nakajima, **2**:58
Carborundum Inc.
The Energy Crisis, by Joseph Cobb, **7**:13
Cartridges/Packaging
Guide to Selecting Digital Cassette and Cartridge Recorder, by Alan Krigman, **7**:59
Cassettes
See: Cartridges/Packaging
Charpie, Robert
Innovation and the Economy, by Alan Krigman, **5**:25
Chemicals (Measurement)
Monitoring Sulfuric Acid Concentration, by J. W. Torrance, **3**:80
Chilton Co.
Precise Control of Energy is the Key to Reduced Spoilage and Waste, by John Kushnerick and Alan Krigman, **3**:11
Choppers/Electric
Permanent Magnet Stepping Motors. Part II. Drivers, by T. E. Beling and J. O. Morin, **2**:60
Cincinnati Milacron
High-Technology Hardware: Components in Search of Systems, by Alan Krigman, **6**:29
Clapp & Poliak, Inc.
Pollution Engineering Congress, by J. A. Dillon, **2**:17
Coatings
Understanding and Applying Strain Gages. Part II: Carriers, Adhesives and Coatings, by Ben Anzalone, **1**:60
Codes/Symbols
Information: Variables and Codes, by Alan Krigman, **3**:4
Combustion Power Co.
The Energy Crisis, by Joseph Cobb, **7**:13
Compressors
Controlling Compressor Surge, by Frank Friedli, Hans Lenz and Stanley Rose, **2**:36
Computational Languages
Microprogramming: The Third Alternative, by J.A. Clapp, **3**:59
Using Microcomputers to Reduce Problem Solving Costs, by C. F. Kottler, Jr. and Robert McGill, **4**:57
Computer-Aided Manufacturing
Computer-Aided Manufacturing, **6**:17
Computer Components
Computers for Control and Automation, by Alan Krigman, **2**:21
Computer Products Co.
Remote Processors: Economy and Reliability, **5**:87
Computer Programs
See: Computational Languages
Computer Systems
Bits, Bugs, Brains, and Bosses, by P. W. Murrill, **7**:35
Computer-Aided Manufacturing, **6**:17
Computer Control: A Multidimensional Continuum, by Alan Krigman, **1**:11
Computers for Control and Automation, by Alan Krigman, **2**:21
DSC/DNC/CNC: Automation or Alphabet Soup? by J. A. Dillon, **1**:35
High-Technology Hardware: Components in Search of Systems, by Alan Krigman, **6**:29
Mini-Systems for Dedicated Control, by G. R. Nieman, **6**:41
R&D: Needs & Priorities in Control, by Alan Krigman, **7**:45
Standardized Systems: Bypassing Intricacies and Solving Problems, by Alan Krigman, **11**:37
Understanding Microprogramming, by Dorothy Strickland, **9**:69
Using Computers to Analyze Continuous Data, by J. J. Catherines, S. A. Clevenson and H. F. Scholl, **9**:83
Using Dedicated Computers for On-Line Process Control. Part III: Performance, by A. E. Nisenfeld, Roger Miyasaka, R. E. Lynch and J. O. Conover, **1**:64
Computers
CNC: Experience at Wiedemann, by Hy Natkin, **5**:33
Computers for Control and Automation, by Alan Krigman, **2**:21
Using Computers to Automate Instrument Systems, by D. G. Dykes, **3**:63
Constant Current
Guide to Selecting Programmable DC Power Supplies, by Alan Krigman, **10**:46
Consumer Product Safety Commission
Product Liability Prevention: Safety Standards the Key, by J. A. Dillon, **11**:29
Consumer Protection Organization Act
Protecting the Consumer, by Joseph Loya, **10**:13
Consumerism
Consumer Protection, by Neil Regeimbal, **1**:25
Protecting the Consumer, by Joseph Loya, **10**:13
Continental Oil Co.
The Energy Crisis, by Joseph Cobb, **7**:13
Control Systems
Professional Registration for Control Systems Engineering, by Alan Krigman, **4**:13
R&D: Needs & Priorities in Control, by Alan Krigman, **7**:45
Control Valves
The Control Valve Industry: Conservative Yet Progressive, by John Dillon, **9**:51
Control Valve Noise: Sources, Reduction, and Measurement, by Gerhard Reethof, **7**:29
Matching Valves with Process Requirements, by J. R. Ramsey and C. D. Fournier, **8**:65
Piston-Balanced Control Valves, by Paul Wing, **9**:59
Using Control Valves in Bypass Service, by A. E. Nisenfeld and J. Eskes, **9**:29
Controllers
Designing Digital Controllers for Fast Processes, by R. A. Mollenkamp, C. L. Smith and A. B. Corripio, **8**:47
Evaluating Digital PI and PID Controller Performance, by A. B. Corripio, C. L. Smith and P. W. Murrill, **7**:55
Using Models to Tune Industrial Controllers, by R. A. Mollenkamp, C. L. Smith and A. B. Corripio, **9**:46
Cooper-Bessemer Co.
Controlling Compressor Surge, by Frank Friedli, Hans Lenz and Stanley Rose, **2**:36
Coupling/Magnetic
Using Magnetic Couplings as Mechanical Function Generators, by James Harbaugh, **12**:46
Creative Strategies, Inc.
Computers for Control and Automation, by Alan Krigman, **2**:21
Cryogenic Liquids
Sensing Cryogenic Fluid Level, by W. F. Schopp, **5**:73

DC Motors
Pulsed D.C. Motor Speed Control for Portable Instrumentation, by W. W. Schopp and H. C. Richardson, **12**:45
Data Acquisition
Test and Measurement Instrumentation, by George Casey, **5**:35
Data General Corp.
DSC/DNC/CNC: Automation or Alphabet Soup? by J. A. Dillon, **1**:35
Using Microcomputers to Reduce Problem Solving Costs, by C. F. Kottler, Jr. and Robert McGill, **4**:57
Data Precision Corp.
Using Radiometry to Measure Resistance, by Paul Lucas, **6**:78
Data Recovery
Using Computers to Analyze Continuous Data, J. J. Catherines, S. A. Clevenson and H. F. Scholl, **9**:83
Data Storage Devices
Selecting Programmable Controllers, by Robert Harte, **8**:59
Datametrics Div.
Heated Sensors for Flow Measurement, by Reuben Wasserman and Howard Grant, **5**:59

Annual Index

Dehumidification
Control of Dryers by the Temperature Difference Technique, by F. C. Harbert, **9**:71
Harry Diamond Laboratories
Fluidic Strain Gages, by T. M. Drzewiecki, **8**:31
Dieterich Standard Corp.
Standardized Systems: Bypassing Intricacies and Solving Problems, by Alan Krigman, **11**:37
Using Magnetic Couplings as Mechanical Function Generators, by James Harbaugh, **12**:46
Differential Amplifiers
Applying Operational Amplifiers, by A. R. Risley, **2**:45
Digital Computers
Designing Digital Controllers for Fast Processes, by R. A. Mollenkamp, C. L. Smith and A. B. Corripio, **8**:47
Guide to Selecting Digital Cassette and Cartridge Recorders, by Alan Krigman, **7**:59
Understanding Microprogramming, by Dorothy Strickland, **9**:69
Using Models to Tune Industrial Controllers, by R. A. Mollenkamp, C. L. Smith and A. B. Corripio, **9**:46
Digital Control
Automated Machine Tool Positioners, **1**:79
Computer Control: A Multidimensional Continuum, by Alan Krigman, **1**:11
DDC: The Money Machine, by P. H. Drinker, **9**:79
Designing Digital Controllers for Fast Processes, by R. A. Mollenkamp, C. L. Smith and A. B. Corripio, **8**:47
Digital Control Algorithms. Part I: Dahlin Algorithms, by Kuo-Cheng Chiu, A. B. Corripio and C. L. Smith, **11**:55
Digital Control Algorithms. Part II: Kalman Algorithms, by Kuo-Cheng Chiu, A. B. Corripio and C. L. Smith, **11**:55
Digital Control Algorithms. Part III, by Kuo-Cheng Chiu, A. B. Corripio and C. L. Smith, **12**:41
Digital Control—New Ingredient in the Recipe, by Dorothy Abel, **11**:50
Evaluating Digital PI and PID Controller Performance, by A. B. Corripio, C. L. Smith and P. W. Murrill, **7**:55
Prospects for Digital Transducers, by J. C. Donavan and Ramesh Krishnaiyer, **5**:15
R&D: Needs & Priorities in Control, by Alan Krigman, **7**:45
Standardized Systems: Bypassing Intricacies and Solving Problems, by Alan Krigman, **11**:37
Using DPMs for Thermocouple Readouts, by A. L. Kadis, **8**:44
Using Models to Tune Industrial Controllers, by R. A. Mollenkamp, C. L. Smith and A. B. Corripio, **9**:46
Digital Equipment Corp.
Using Programmable Controllers, by D. T. Symmes, **8**:57
Digital Panel Meters
Using DPMs for Thermocouple Readouts, by A. L. Kadis, **8**:44
Digital Signals
Guide to Selecting Digital Multiplexers, by Alan Krigman, **11**:63
Signals and Symbols, by Alan Krigman, **2**:4
Digital Transducers
Inherently Digital Transducers, by R. R. Richard, **3**:71
Prospects for Digital Transducers, by J. C. Donavan and Ramesh Krishnaiyer, **5**:15
Dimensional Analysis
Understanding Dimensional Instability, by R. E. Maringer, **5**:65
Dimensionless Numbers
The Land Chart: A Table of Dimensionless Numbers, by Alan Krigman, **8**:37
Direct Current
Guide to Selecting Programmable DC Power Supplies, by Alan Krigman, **10**:46
Direct Digital Control
See: Digital Control
Display Systems
Guide to Selecting Graphic Displays, by Alan Krigman, **9**:87
Improving Operator Performance with Predictive Displays, by D. J. Prosin and C. R. Kelley, **9**:93
The Process Picture Captured—visual aids for the operator, by J. A. Gump, **12**:33
Driver Circuits
Permanent Magnet Stepping Motors. Part II: Drivers, by T. E. Belling and J. O. Morin, **2**:60
Drying
Control of Dryers by the Temperature Difference Technique, by F. C. Harbert, **9**:71
Dudlik Gasket & Stampings Div.
Small Shops Adopt NC: Chips are Flying, by Hy Natkin, **9**:55
Dunlap and Associates, Inc.
Improving Operator Performance with Predictive Displays, by D. J. Prosin and C. R. Kelley, **9**:93
E. I. Dupont de Nemours & Co.
Productivity and Economic Stability, by Joseph Cobb, **8**:6
Professional Registration for Control Systems Engineering, by Alan Krigman, **4**:13
Durrion Co.
Using Zero and Span Adjustments in High-Pressure Measurements, by Harry Ruch and S. M. Afzal, **5**:50

Economics
Innovation and the Economy, by Alan Krigman, **5**:25
Lively 73 Market Living Up to Expectations, by S. P. Kaprielyan, **9**:25
Productivity and Economic Stability, by Joseph Cobb, **8**:6
Trade with Russia: The Soviet Economy, by Alan Krigman, **3**:25
Edison Electric Institute
Air Pollution: Industrial R&D, by J. A. Dillon, **3**:27
Eddy Current Losses
Using Eddy Currents for Proximity Measurements, by J. F. Ellis, **4**:37
Eddy Currents
Using Eddy Currents for Proximity Measurements, by J. F. Ellis, **4**:37
Electrical Measuring Instruments
Test and Measurement Instrumentation, by George Casey, **5**:35
What's in an Accuracy Specification? by L. J. Lunas, **11**:69
Electric Motors
Pulsed D.C. Motor Speed Control for Portable Instrumentation, by W. W. Schopp and H. C. Richardson, **12**:45
Electrical Power Consumption
Electrical Demand: Buying Energy and Power, by Robert McConnell, **10**:25
Electric Power Production
Electrical Demand: Buying Energy and Power, by Robert McConnell, **10**:25
Electrical Power: The Overlooked Variable, by R. L. Cooper, **7**:40
Low Value Voltage Supply, by J. E. McAlister, **7**:42
The Energy Crisis, by Joseph Cobb, **7**:13
Electrical Resistance
Using Radiometry to Measure Resistance, by Paul Lucas, **6**:78
Electronic Equipment
Guide to Selecting Uninterruptible Power Systems, by Instruments and Control Systems Staff, **3**:84
Test and Measurement Instrumentation, by George Casey, **5**:35
Electronic Instruments
Protecting Instruments Against Lightning, by R. A. Hanson, **1**:57
Electronic Switches
Guide to Selecting Temperature Switches, by Instruments and Control Systems Staff, **5**:77
Ellison Instrument Div.
Standardized Systems: Bypassing Intricacies and Solving Problems, by Alan Krigman, **11**:37
Using Magnetic Couplings as Mechanical Function Generators, by James Harbaugh, **12**:46
Energy
The Energy Crisis, by Joseph Cobb, **7**:13
Managing Solid Wastes: Pilot Projects, by Dorothy Abel, **8**:11
Precise Control of Energy is the Key to Reduced Spoilage and Waste, by John Kushnerick and Alan Krigman, **3**:11
Engineers
Pension Plan Protection: Will the Engineer Finally Make It? by C. Suchocki, **11**:15
Professional Registration for Control Systems Engineering, by Alan Krigman, **4**:13
Engines, Automobile
Automated Engine Testing, by F. W. Kirk and Stanley Rose, **1**:37
Automotive Diagnosis, by D. S. Goren, **4**:17
Environmental Protection Agency
Clean Water, by Neil Regeimbal, **1**:25
The Energy Crisis, by Joseph Cobb, **7**:13
Federal Funds for Air Pollution R&D, by J. A. Dillon, **1**:27
Federal Water Pollution Control Act Amendments of 1972, by J. A. Dillon, **5**:31
Managing Solid Wastes, by J. A. Dillon, **4**:29
Pollution Control goes International, by Hy Natkin, **11**:25
Pollution Control in the Textile Industry, by Dorothy Abel, **10**:15
Validating Air Pollution Test Methods, by J. A. Dillon, **7**:25
Environmental Tests
Pulsed D.C. Motor Speed Control for Portable Instrumentation, by W. W. Schopp and H. C. Richardson, **12**:45
European Economic Community
Pollution Control Goes International, by Hy Natkin, **11**:25
Explosives
Confined Linear Energy Sources, by M. C. Anderson and W. B. Heidemann, **5**:48

Factory Mutual Liability Insurance Co. of America
Instrumentation Under OSHA, by J. A. Dillon, **3**:13
Fail Safe
Confined Linear Energy Sources, by M. C. Anderson and W. B. Heidemann, **5**:48
Feedback Control
Using a Capacitor to Measure Particle Flow, by T. Tanaka, K. Gotch and H. Nakajima, **2**:58
Fenwal Inc.
Selecting Temperature Controllers, by J. W. Rice, **2**:67
Fermentation
Brewing: Instrumentation at Schaefer, **4**:33
Firemans Fund American Insurance
Product Liability Prevention: Safety Standards the Key, by J. A. Dillon, **11**:29
Fisher Controls Co.
Control Valve Noise: Sources, Reduction, and Measurement, by Gerhard Reethof, **7**:29
Mini-Systems for Dedicated Control, by G. R. Nieman, **6**:41
R&D: Needs & Priorities in Control, by Alan Krigman, **7**:45
Standardized Systems: Bypassing Intricacies and Solving Problems, by Alan Krigman, **11**:37
Flow Measurement
Using a Capacitor to Measure Particle Flow, by T. Tanaka, K. Gotch, and H. Nakajima, **2**:58
Flow Switches
Using Flow Switches for Control, by J. V. Graham, **5**:46
Fluid Controls Institute, Inc.
Control Valve Noise: Sources, Reduction, and Measurement, by Gerhard Reethof, **7**:29
Fluid Flow
Automotive Diagnosis, by D. S. Goren, **4**:17
Brewing: Instrumentation at Schaefer, **4**:33
Controlling the Continuous Mixing of Particles, by T. Tanaka and H. Nakajima, **8**:22
Fluidic Strain Gages, by T. M. Drzewiecki, **8**:31
Frequency Response of Short Pressure Probes, by T. W. Nyland, D. R. Englund and R. C. Anderson, **8**:27
Heated Sensors for Flow Measurement, by Reuben Wasserman and Howard Grant, **5**:59
Matching Valves with Process Requirements, by J. R. Ramsey and C. D. Fournier, **6**:65
Measuring Flow in Open Channels, by E. F. Ball, **4**:50
Sensing Cryogenic Fluid Level, by W. F. Schopp, **5**:73
Tuning Controllers for Interacting Processes, by Niren Suchanti, Kwan Chung and C. D. Fournier, **4**:47
Using Analog Function Modules, by Dan Sheingold, **11**:41
Using Control Valves in Bypass Service, by A. E. Nisenfeld and J. Eskes, **9**:29
Fluidic Devices
Control Valve Noise: Sources, Reduction, and Measurement, by Gerhard Reethof, **7**:29
Controlling Compressor Surge, by Frank Friedli, Hans Lenz and Stanley Rose, **2**:36
Factors Governing Fluid Power Purchases, by S. P. Kaprielyan, **10**:21
Fluidic Strain Gages, by T. M. Drzewiecki, **8**:31
Food and Drug Administration
Laser Safety, by J. A. Dillon, **5**:29
Food Processing Plants
Digital Control—New Ingredient in the Recipe, by Dorothy Abel, **11**:50
Forecasting
Lively 73 Market Living Up to Expectations, by S. P. Kaprielyan, **9**:25
Foreign Trade
Japanese Trade Policies: Changes Loom, by C. J. Suchocki, **9**:9
Trade with Russia: The Soviet Economy, by Alan Krigman, **3**:25
Want to Sell Overseas? Use Commerce Services, by S. P. Kaprielyan, **11**:31
Foxboro Co.
The Control Valve Industry: Conservative Yet Progressive, by John Dillon, **9**:51
Programmable Controllers, **4**:79
R&D: Needs & Priorities in Control, by Alan Krigman, **7**:45
Remote Processors: Economy and Reliability, **5**:87
Fracture (Mechanics)
Using the J Integral for Evaluating Fracture Safety, by F. J. Loss, **8**:35
Frankford Arsenal
Automotive Diagnosis, by D. S. Goren, **4**:17
Frequency Synthesizers
Test and Measurement Instrumentation, by George Casey, **5**:35
Frink, Donald
Instrumentation Removes Much of the Need to Have Humans on Site, by Alan Krigman, **7**:4
Frost and Sullivan, Inc.
Leasing: Use Now, Pay Later, by D. S. Goren, **6**:35
Test and Measurement Instrumentation, by George Casey, **5**:35
Function Generators
Using Magnetic Couplings as Mechanical Function Generators, by James Harbaugh, **12**:46

Gas Flow
Using Analog Function Modules, by Dan Sheingold, **11**:41
General Automation Corp.
DSC/DNC/CNC: Automation or Alphabet Soup? by J. A. Dillon, **1**:35
General Electric Co.
Applying Ultrasonic Probes to Find Hidden Defects, by P. A. Fessler and W. E. Michaud, **12**:29
DSC/DNC/CNC: Automation or Alphabet Soup? by J. A. Dillon, **1**:35
General Mills Co.
Digital Control—New Ingredient in the Recipe, by Dorothy Abel, **11**:50
Geothermal Energy
The Energy Crisis, by Joseph Cobb, **7**:13
Government
Innovation and the Economy, by Alan Krigman, **5**:25
Productivity and Economic Stability, by Joseph Cobb, **8**:6
Graphic Arts
The Process Picture Captured—visual aids for the operator, by J. A. Gump, **12**:33
Graphic Displays
Guide to Selecting Graphic Displays, by Alan Krigman, **9**:87
Improving Operator Performance with Predictive Displays, by D. J. Prosin and C. R. Kelley, **9**:93
The Process Picture Captured—visual aids for the operator, by J. A. Gump, **12**:33
Graphic Methods
The Process Picture Captured—visual aids for the operator, by J. A. Gump, **12**:33
Grumman Aerospace Corp.
Using Microcomputers to Reduce Problem Solving Costs, by C. F. Kottler, Jr. and Robert McGill, **4**:57

Hamlin, Inc.
Magnetic-Reed Temperature Switches, by N. D. Miller, **5**:55
Health Programs
For the Benefit of Society, by J. A. Dillon, **1**:31
Instrumentation Under OSHA, by J. A. Dillon, **3**:13
Laser Safety, by J. A. Dillon, **5**:29
NIOSH Recommends New Safety Standards, by J. A. Loya, Jr., **8**:15
Hearing
Noise and Human Performance, by W. F. Grether, **2**:23

Heat Exchangers
Using Control Valves in Bypass Service, by A. E. Nisenfeld and J. Eskes, **9**:29
Heat Recovery
Waste Heat: Friend or Foe? by Joseph Loya, **9**:11
Hewlett-Packard Co.
Laser Safety, by J. A. Dillon, **5**:29
Hider Mfg. Co.
Small Shops Adopt NC: Chips are Flying, by Hy Natkin, **9**:55
High Pressure Testing
Using Zero and Span Adjustments in High-Pressure Measurements, by Harry Ruch and S. M. Afzal, **5**:50
Hoke, Inc.
The Control Valve Industry: Conservative Yet Progressive, by John Dillon **9**:51
Hokkaido University
Controlling the Continuous Mixing of Particles, by T. Tanaka and H. Nakajima, **8**:22
Using a Capacitor to Measure Particle Flow, by T. Gotoh and H. Nakajima, **2**:58
Holograms
Understanding Holography, by A. H. Rodemann, D. R. Breglia and W. N. Mohon, **3**:77
Holography
See: Holograms
Honeywell, Inc.
The Control Valve Industry: Conservative Yet Progressive, by John Dillon, **9**:51
Digital Control—New Ingredient in the Recipe, by Dorothy Abel, **11**:50
Instrumentation Under OSHA, by J. A. Dillon, **3**:13
Hot-Wire Anemometers
See: Anemometers
Human Engineering
Designing the Operator into Highly Automated Systems, by H. L. Ammerman and W. H. Melching, **3**:67
Guide to Selecting Graphic Displays, by Alan Krigman, **9**:87
Improving Operator Performance with Predictive Displays, by D. J. Prosin and C. R. Kelley, **9**:93
Human Resources Research Organization
Designing the Operator into Highly Automated Systems, by H. L. Ammerman and W. H. Melching, **3**:67

ITE Imperial Corp.
Heated Sensors for Flow Measurement, by Reuben Wasserman and Howard Grant, **5**:59
Indian Institute of Technology (Bombay)
A Low-Velocity Hot-Wire Anemometer, by T. S. Sarma and G. R. Sarma, **4**:62
Industry
Lively 73 Market Living Up to Expectations, by S. P. Kaprielyan, **9**:25
Information Rate
Information: Variable and Codes, by Alan Krigman, **3**:4
Input-Output Devices
Selecting Programmable Controllers, by Robert Harte, **6**:59
Instrument Society of America
The Control Valve Industry: Conservative Yet Progressive, by John Dillon, **9**:51
Instrument Systems
Using Computers to Automate Instrument Systems, by D. G. Dykes, **3**:63
Instrumentation

INSTRUMENTS & CONTROL SYSTEMS

The field served by INSTRUMENTS & CONTROL SYSTEMS (I&CS) represents a broad spectrum of users and vendors of components, systems and services—everything that helps to measure and regulate production, virtually in all industrial sectors. I&CS feature articles are addressed to engineers and managers concerned with applying instrumentation and control techniques for economizing the use of resources and optimizing the output of processes.

Publisher: George Jacovides

Editor-in-Chief: Peter J. Brennan

Managing Editor: John A. Dillon

Associate Editor: Hy Natkin

Assistant Editor: Dorothy Abel

Buyers' Guide Editor: Patrick O'Donnell

Designer: Suzanne Mychalejko

European Editor: Yvonne Attiyate, Zurich

Washington Bureau: Carl Suchocki, Chief

Production Manager: Margaret Ruby

Production Assistant: Patricia Dugan

Marketing Manager: S. Peter Kaprielyan

Circulation Manager: Kirk W. Ulshafer

The Chilton Electronics and Instrumentation Group

Instruments and Control Systems, EE/Systems Engineering Today, Medical Electronics & Equipment News, Instrument & Apparatus News, Electronic Component News.

INSTRUMENTS AND CONTROL SYSTEMS published by Chilton Company, Chilton Way, Radnor, PA 19089 (215/687-8200). Thirteen issues mailed monthly with extra issue in November. Controlled Circulation rates of postage paid at Philadelphia, Pa.

© Chilton Company 1974

POSTMASTER: Return Form 3579 WITH COMPLETE ADDRESS LABEL to: Instruments and Control Systems, P.O. Box Number 2025, Radnor, PA 19089.

INSTRUMENTS AND CONTROL SYSTEMS is circulated free in the United States and Canada to qualified individuals. Non-qualified and Foreign subscription rate is $25.00 per year.

OUT-OF-PRINT COPIES are available in complete volumes as positive microfilm copies from University Microfilms, Inc., 300 N. Zeeb Road, Ann Arbor, Michigan 48106.
